Iyenomen Akhigbe

Profile

As an individual with keen interest on how things work, and understanding concepts in technologies with regard to today's world in a bid to stay relevant and valuable, i have taken on to learning stacks pertaining to web developments.

In the course of researching and learning i have garnered equivalent skills set such as react, node, state management and redux.

One of my biggest milestone achieved is the experience of collaborating with a team of three (i inclusive) to solve iot related problems which is yet ongoing.

I do possess good communication skill, presentation abilities and team spirit.
