EXPERIENCE

Frontend development   2024

My First Home Limited: Birthday Messaging   Remote

- Built user-friendly applications, specializing with react framework
- Contributed to the development of a birthday calendar and a birthday messaging extension for a birthday messaging company, enhancing user engagement and automation.
- Skilled in designing and implementing intuitive UI components, integrating APIs, and ensuring seamless functionality.
- Passionate about crafting scalable and efficient web solutions to improve user experience.

KEY ACHIEVEMENTS

💎 **Developed a Dynamic Birthday Calendar:**
Designed and implemented an interactive birthday calendar that efficiently tracks and displays upcoming birthdays, improving user engagement and event management.

💎 **Built a Birthday Messaging Extension:**
Contributed to the development of a browser extension that automates birthday reminders and personalized messaging, enhancing customer experience and engagement.

💎 **Optimized User Experience:**
Ensured a seamless and responsive UI for both the birthday calendar and extension, improving accessibility across devices.

💎 **Integrated API for Automation:**
Implemented API functionalities to fetch and send birthday messages automatically, reducing manual effort and streamlining user interactions.

💎 **Enhanced System Performance:**
Optimized the codebase to improve application speed and reduce loading times, ensuring a smooth user experience.
